## 1 Project WHSE Policy

(Company) considers safety as its first priority, at the same time, protecting the environment from the impacts of the project activities. (Company) will provide appropriate safeguards and mitigation measures during the design, construction and completion phase of the project.

(Company) has the full responsibility to provide a safe workplace for all personnel to achieve "Zero LTI / NLTI" and to protect the environment to achieve "Zero Environmental incident/Accident" through the effective adherence of this Policy.

The Project WHSE Management will be organized to ensure compliance to the Project requirements as a whole with the Occupational Safety and Health Guidelines, WHSE requirements and WHSE specifications. Each member of the Project Team ("Team" or "Work Force") shall give their commitment to ensure that (Company)'s WHSE Policy and principles are achieved.

In fulfilling this commitment, (Company) shall:

- Establish an effective WHSE Management Plan based on the Occupation Safety and Health Acts.
- Comply with Ministry of Employment & Labor and Occupational Health & Safety Legislation, including City, National, and (Client) (Environment, Health and Safety) Standard.
- Ensure the availability of resources and organisation competent to establish, implement and manage WHSE Management Plan
- Reinforce accident prevention through hazard identification, risk assessment, job hazard analysis, training, investigation and a proper communication channel.
- Manage environmental harmful factors through the implementation of waste management systems, air and soil pollution control, noise control, water pollution control, and hazardous material management considering national & international environment laws and regulations.
- Reinforce preventive activities by monitoring, sampling and prior investigation on environment impacts to the project.
- Monitor and measure performance of the effectiveness of the WHSE Management Plan implementation.
